INDEX

1 INTRODUCTION 12

2 THE BIGGEST CHALLENGE 13

2.1 Competing against others 13

2.2 Competing against yourself 13

2.3 Participants of the market 14

2.3.1 Liquidity providers 15

2.3.2 Market movers and market followers 16

2.4 Fundamental rules 16

2.4.1 Buy low and sell high 17

2.4.2 The advantage of momentum 18

2.4.3 Catalysts for price movements 18

2.5 Volatility 20

2.6 Events and news 20

2.7 Market manipulation 21

3 PROFESSIONAL MARKET ANALYSIS 22

3.1 Analysis in 4 steps 22

3.2 Market structure. How is price moving? 25

3.2.1 Ranges 25

3.2.2 Trending markets: uptrend or downtrend 30

3.2.3 Choppy markets 31

3.2.4 Mixed market structures 32

3.3 Selection of the right timeframe 34

3.3.1 Aligning timeframe with your trading style 34

3.3.2 Multiple timeframe analysis 34

3.3.3 Timeframes and volatility 36

3.3.4 Types of charts 36

4 PROFESSIONAL TECHNICAL ANALYSIS 38
4.1 Horizontal support and resistance levels 38
4.1.1 Fundamental characteristics of support and resistance levels..... 38
4.2 Channels 41
4.2.1 The wrong method of drawing channels 41
4.2.2 The professional method of drawing channels 42
4.3 Trendlines: the professional method..... 45
4.4 Confluence is key in trading..... 51
4.4.1 Why does confluence work?..... 51
4.4.2 Confluence and confidence..... 51
4.4.3 Confluence to define entry and exit levels 54
4.4.4 Why good-looking trades are the riskiest ? 54
4.5 Indicators 55
4.5.1 Combining lagging and leading indicators: Less is more..... 55
4.5.2 Leading indicators..... 56
4.5.3 Lagging indicators 58
5 PRICE ACTION: THE MATHEMATICAL VIEW..... 64
5.1 Fractals..... 64
5.2 Measured moves: the repeating order..... 66
5.2.1 The Importance of measured moves..... 66
5.2.2 Fundamental characteristics 67
5.2.3 How to use measured moves..... 69
5.2.4 How many measured moves are typical..... 71
5.3 Price movements in channels and ranges 71
5.4 Target prices: Where does the price tend to go?..... 73
5.4.1 Types of attraction areas 74
5.4.2 Retest of a previous swing: a simple and powerfull strategy..... 75
5.4.3 Previous day high or low 78
5.4.4 Round numbers..... 78

6 PRICE ACTION as a LANGUAGE 79
6.1 Candlestick patterns, the letters of the language 79
6.1.1 Reliable candlestick patterns as entry signals 80
6.1.2 Further candlestick patterns 87
6.1.3 Some general rules about candles 88
6.2 Analyzing patterns 92
6.3 The importance of having a reference: EMA 21 94
6.4 Basic patterns: the words of price action 97
6.4.1 W and WV Patterns 97
6.4.2 Pullbacks 101
6.4.3 123 Patterns 102
6.4.4 Trap: the failing breakout 105
6.4.5 The momentum pattern 107
6.5 Ideal price action sequences 108
6.5.1 The most common price action sequence 108
6.5.2 The price action sequence with a trap setup 111
7 ADVANCED PATTERNS: HOW TO TRADE THEM IN DETAIL 114
7.1 Trading the ideal price cycle sequence with a trap pattern 114
7.1.1 How to trade a W pattern after a 2-legged retracement? 118
7.1.2 Additional trade entry signals after a W pattern 122
7.2 Trading Ranges like a pro 123
7.2.1 Identifying ranges 123
7.2.2 Fundamental characteristics 123
7.2.3 How to trade ranges 124
7.2.4 Probable target prices in a range 126
7.2.5 Does a range always act as an attraction area? 128
7.3 Triangles 129
7.3.1 Buy and sell areas 129
7.3.2 Entry pattern / signal 130

7.4 Pullbacks at a major support level (uptrend) 133
7.5 Runs 135
7.5.1 Run and Channel 135
7.5.2 Ray and Trap 137
7.6 Flags 140
7.7 Wedges 142
7.7.1 How to trade inside wedges 143
7.8 Reversal patterns 145
7.8.1 Complex trap reversal 145
7.8.2 Persistence channel 147
7.8.3 3 x 3 Tries reversal 151
7.8.4 Climax reversal: parabolic movement 153
7.9 Gaps 156
7.10 Failures 157
7.10.1 Even the best strategy can fail 157
7.10.2 Failure examples 158
8 CORRELATIONS AND DEPENDENCY 163
8.1 Correlation to major indexes 163
8.1.1 Why does correlation work? 163
8.1.2 Why market weakness often spreads across stocks 163
8.2 How to use correlation between stocks 164
9 RISK MANAGEMENT 167
9.1 Risk-Reward Ratio (RR) 167
9.2 PnL 168
9.3 Position sizing 169
9.3.1 How to calculate the number of stocks to trade 169
9.3.2 How to calculate the number of futures contracts to trade 171
9.4 How to calculate volatility based Stop-losses 174
9.4.1 Steps to calculate a stop-loss using ATR14 174

9.5 A reliable trailing stop-loss strategy 175
9.6 Further trading parameters 176
9.6.1 Expectancy ratio 176
9.6.2 Maximal drawdown 176
9.6.3 Winning rate 177
9.6.4 Bernoulli distribution 177
10 EXECUTION 178
10.1 When to use limit orders 179
10.2 How to apply limit orders to improve the risk-reward ratio 180
11 TRADING JOURNAL 182
11.1 Key Parameters to track 182
11.2 Sample of my trading journal 183
12 PREPARATION OF A TRADING SESSION 186
12.1 Checklist 186
13 COMMON ERRORS 188
13.1 The fatal effect of a long streak of winning trades: overconfindence 188
13.2 Never convert a short-term trade in a long-term investment: the emotional attachment 189
13.3 The productivity trap in trading 191
14 COMPONENTS OF A GOOD TRADE 192
15 PSYCHOLOGY 195
15.1 Meltdown effect 195
15.1.1 Key Characteristics of a trader's meltdown behavior 195
15.2 Overconfidence 198
15.3 The role of endorphins in overtrading 199
15.3.1 *How to combat the endorphin rush* 200
15.4 Loss aversion. Inability to accept losses 201
15.4.1 Losses acceptance in physical goods trading 202
15.5 Personal Issues or stress outside of trading 204

15.6 The “This time I have to be right” bias 204
15.7 Self-justification 204
15.8 The “This can not happen to me” bias 204
15.9 Don’t overlook the good while searching for the perfect 205
15.9.1 Not for perfectionists 205
15.9.2 Analysis paralisis 205
15.9.3 Set realistic expectations 206
15.10 To be in a hurry 206
15.11 Trading will challenge you at some point 207
15.12 The hardest part is to accept a losing streak 208
15.13 Detaching the value of the money you are trading with 208
15.14 Be patient: It takes time to be profitable 209
15.15 Gaining confidence with small wins 210
15.16 Separate trading activities from your daily life 210
15.17 Accountablity partner 211
15.18 Addiction in day trading, the healthy approach 212
15.18.1 Why day trading can be addictive 212
15.18.2 Signs of day trading addiction 212
16 TRADING SKILLS: ANALOGY TO SPORTS 213
17 MANIPULATION TECHNIQUES 217
17.1 Why is it important to know them? 217
17.2 Herd behavior 217
17.3 Retail traders are predictable 218
17.4 Retail traders as liquidity source 218
17.5 Moving the market 219
17.6 Stop-loss hunting 219
17.7 False breakouts 219
17.8 How can you avoid this techniques 220
17.9 Manipulation methods 221

17.9.1 Price manipulation....221
17.9.2 Manipulation of information....223
17.10 Manipulation and trading patterns....225
18 NEWS....227
18.1 How can you use news?....228
18.2 Opinions, recommendations and analyst´s reports....228
18.2.1 Analyst's recommendations and market sentiment....228
18.3 News and the impact on asset prices....229
18.3.1 Macroeconomic data....229
18.3.2 Data related to a specific company or market....230
18.3.3 Sector related news....231
18.3.4 One time Events....231
19 ADVANCED TOOLS AND TECHNIQUES....232
19.1.1 How does the auction theory in the stock market work?....232
19.2 Order Flow....233
19.2.1 Imbalances....235
19.3 Order book....237
19.4 Times and sales....238
20 RECOMMENDATIONS....241
