

Münsteraner Schriften zur Internationalen Unternehmensrechnung

Herausgegeben von Peter Kajüter

Matthias Moeschler

Cost Accounting in Germany and Japan

A Comparative Analysis

Band 5

PETER LANG
Internationaler Verlag der Wissenschaften

Contents overview

1 Groundwork 1
1.1 Introduction 1
1.2 Characterization of comparative management accounting 16
1.3 Theoretical perspectives for comparative management accounting research 34
1.4 Prior empirical research on comparative management accounting and implications for the study 52
1.5 Research design 71

2 Specification of the conceptual framework and hypotheses development 85
2.1 Context of cost accounting systems 85
2.2 Cost accounting objectives 135
2.3 Design of cost accounting systems 144
2.4 Performance of cost accounting systems 170
2.5 Conclusions 178

3 Empirical analysis 183
3.1 Design of the empirical investigation 183
3.2 Context of cost accounting systems 215
3.3 Cost accounting objectives 236
3.4 Design of cost accounting systems 244
3.5 Performance of cost accounting systems 300
3.6 Partial-least-squares (PLS) analysis 325
3.7 Summary and discussion of the empirical findings 334

4 Summary and outlook 343
4.1 Main findings and contributions of the study 343
4.2 Limitations 347
4.3 Further research 351

1 Groundwork 1

1.1 Introduction 1

1.1.1 Motivation 1

1.1.2 Outline of the study 7

1.1.3 Methodological grounding 8

1.1.3.1 Objectives of research in business studies 9

1.1.3.2 Methods of research in business studies 11

1.1.3.3 Scientific positioning of the study 12

1.1.4 Conceptual delimitation of fundamental terms 13

1.1.4.1 Management accounting 13

1.1.4.2 Cost accounting 14

1.2 Characterization of comparative management accounting 16

1.2.1 History and working definition 16

1.2.2 Theoretical and practical relevance 19

1.2.3 Convergence and divergence in management accounting 21

1.2.4 Framework for analysis 24

1.2.5 Research approaches 26

1.2.6 Issues in equivalence 27

1.3 Theoretical perspectives for comparative management accounting research 34

1.3.1 Theory of industrialism 34

1.3.2 Contingency theory 35

1.3.3 Cultural contingency approach 38

1.3.4 Societal effects approach 43

1.3.5 New institutionalism 45

1.3.6 Historical analysis 48
1.3.7 Discussion 49
1.3.8 Determination of the study's theoretical perspective 51
1.4 Prior empirical research on comparative management accounting and implications for the study 52
1.4.1 Selection of studies 54
1.4.2 Overview of comparative management accounting studies 55
1.4.3 Review on comparative research on cost accounting 60
1.4.3.1 Characteristics of the studies 60
1.4.3.2 Summary of the research findings 64
1.4.3.3 Methodological issues 66
1.4.4 Implications of prior research 69
1.4.4.1 Choice of the level of analysis 69
1.4.4.2 Discussion of methodological issues to increase explanatory power 70
1.5 Research design 71
1.5.1 Determination of the applied research method 71
1.5.2 Development of the conceptual research framework and base hypotheses 75
1.5.3 Application of the conceptual framework 79
1.5.4 Specification of the conceptual framework 81
1.5.5 Consideration of issues in equivalence 83

2 Specification of the conceptual framework and hypotheses development 85
2.1 Context of cost accounting systems 85
2.1.1 Country-specifics 85
2.1.1.1 Selection and preliminary considerations 85
2.1.1.2 Specifics of German cost accounting 89
2.1.1.2.1 History 89
2.1.1.2.2 Country-specifics 93
2.1.1.3 Specifics of Japanese cost accounting 102
2.1.1.3.1 History 102
2.1.1.3.2 Country-specifics 106
2.1.1.4 Comparison between Germany and Japan 114

2.1.1.5 Operationalization and hypotheses development 116
2.1.2 Other external context factors 120
2.1.3 Internal context factors 123
2.1.3.1 Company size 124
2.1.3.2 Potential for cost distortion 127
2.1.3.3 IT systems quality 130
2.1.3.4 Overall interest in cost accounting 132
2.1.3.5 Industry 133
2.1.3.6 Type of organization 134
2.2 Cost accounting objectives 135
2.2.1 Providing information for compiling financial reports 136
2.2.2 Providing information for managerial use 137
2.2.2.1 Planning and control 138
2.2.2.2 Facilitating and influencing decisions 139
2.2.2.3 Supporting short-term and long-term decisions 141
2.3 Design of cost accounting systems 144
2.3.1 Preliminary considerations 144
2.3.1.1 Working definition of the cost accounting system 144
2.3.1.2 Approach to describe the conceptual design of cost accounting systems 146
2.3.2 Conceptual design of cost accounting systems 149
2.3.2.1 Complexity 149
2.3.2.2 Timeliness 154
2.3.3 Selection and operationalization of systems' elements 156
2.3.4 Aggregation rules for determining systems' degree of complexity and timeliness 159
2.3.5 Hypotheses development 162
2.3.5.1 Influence of country-specifics upon cost accounting systems 162
2.3.5.2 Influence of other external and internal context factors upon cost accounting systems 164
2.3.5.3 Influence of cost accounting objectives upon cost accounting systems 167
2.4 Performance of cost accounting systems 170

2.4.1 Selection of the approaches to measure performance ... 170
2.4.2 Operationalization of performance ... 173
2.4.3 Hypotheses development ... 174
2.5 Conclusions ... 178

3 Empirical analysis ... 183
3.1 Design of the empirical investigation ... 183
3.1.1 Definition of the sample ... 183
3.1.2 Data collection, quality of the sample, and preparation of the data ... 188
3.1.2.1 Procedure of data collection ... 188
3.1.2.2 Quality of the sample ... 190
3.1.2.3 Preparation of the data ... 194
3.1.3 Selection and fundamentals of the applied statistical methods ... 196
3.1.3.1 Overview of the applied statistical methods ... 196
3.1.3.1.1 Univariate analyses ... 197
3.1.3.1.2 Bivariate analyses ... 197
3.1.3.1.3 Multivariate analyses ... 198
3.1.3.2 Description of the partial-least-squares (PLS) method ... 203
3.1.3.2.1 Structure ... 203
3.1.3.2.2 Specification of the constructs ... 205
3.1.3.2.3 Analysis of moderating effects ... 207
3.1.3.2.4 Quality criteria ... 208
3.1.3.2.5 Application ... 213
3.2 Context of cost accounting systems ... 215
3.2.1 Country-specifics ... 215
3.2.1.1 Cultural preferences for cost information ... 215
3.2.1.2 Relationship of cost accounting towards financial and management accounting ... 217
3.2.1.3 Education of cost accountants ... 220
3.2.1.4 Conclusions on country-specifics ... 223
3.2.2 Other external context factors ... 224
3.2.2.1 External complexity ... 224
3.2.2.2 External dynamics ... 225

3.2.3 Internal context factors ... 226
3.2.3.1 Company size ... 226
3.2.3.2 Potential for cost distortion ... 228
3.2.3.3 IT systems quality ... 229
3.2.3.4 Overall interest in cost accounting ... 231
3.2.3.5 Type of organization ... 234
3.2.4 Selection of context factors for regression analysis ... 235
3.3 Cost accounting objectives ... 236
3.4 Design of cost accounting systems ... 244
3.4.1 Complexity ... 244
3.4.1.1 Bivariate analysis ... 244
3.4.1.1.1 Single elements of the cost accounting system ... 244
3.4.1.1.2 Correlations between single complexity scores ... 259
3.4.1.1.3 Aggregated complexity scores ... 261
3.4.1.2 Multivariate analysis of single and aggregated complexity scores ... 267
3.4.1.3 Activity-based costing as an alternative measure for cost accounting systems' complexity ... 273
3.4.1.3.1 Analysis of ABC complexity score ... 273
3.4.1.3.2 Analysis of ABC classification ... 276
3.4.1.3.3 Interpretation of the robustness test ... 282
3.4.2 Timeliness ... 283
3.4.2.1 Bivariate analysis of single timeliness scores ... 283
3.4.2.2 Bivariate analysis of single and aggregated timeliness scores ... 286
3.4.2.3 Multivariate analysis of single and aggregated timeliness scores ... 292
3.4.3 Future development ... 296
3.5 Performance of cost accounting systems ... 300
3.5.1 Determination of the applied performance measures ... 300
3.5.2 Bivariate analysis ... 302
3.5.3 Multivariate analysis ... 308

3.5.3.1 Multiple regression analysis of linear relationships 308
3.5.3.2 Analysis of interaction effects 311
3.5.3.3 Analysis of diminishing marginal utility of systems' complexity and timeliness 316
3.6 Partial-least-squares (PLS) analysis 325
3.6.1 Development of the PLS model 325
3.6.2 Quality criteria 326
3.6.3 Verification of the multiple regression results and hypothesis testing 332
3.7 Summary and discussion of the empirical findings 334
3.7.1 Cross-national differences and similarities in cost accounting 334
3.7.2 Determinants of cost accounting systems' complexity, timeliness, and performance 336
3.7.3 Implications for practitioners and researchers 340

4 Summary and outlook 343
4.1 Main findings and contributions of the study 343
4.2 Limitations 347
4.3 Further research 351
