|----------------------------------------------------------------------------------------|----|
| List of Figures                                                                        | 11 |
| List of Tables                                                                         | 13 |
| List of Abbreviations                                                                  | 15 |
| List of Symbols                                                                        | 17 |
| I Main Introduction                                                                    | 19 |
| I.1 Objectives and Motivation                                                          | 19 |
| I.2 Course of the Investigation                                                        | 23 |
| II Mergers of German Public Savings Banks – Case Study Evidence against Bad Reputation | 27 |
| II.1 Introduction                                                                      | 27 |
| II.1.1 Objective and Motivation                                                        | 27 |
| II.1.2 Course of the Investigation                                                     | 29 |
| II.2 Public Savings Banks – Structure and Attributes                                   | 30 |
| II.2.1 Organizational Structure                                                        | 30 |
| II.2.2 Attributes of Public Savings Banks                                              | 31 |
| II.2.2.1 Municipal Obligation                                                          | 31 |
| II.2.2.2 Business Policy and Public Mandate                                            | 31 |
| II.2.2.3 Public Liability                                                              | 32 |
| II.3 Particularities of Mergers of Public Savings Banks                                | 33 |
| II.3.1 Possible Merger Types                                                           | 33 |
| II.3.2 Legal Restrictions                                                              | 34 |
| II.3.3 Merger Motives                                                                  | 35 |
| II.3.4 Possible Drawbacks and Risks                                                    | 37 |
| II.4 Analysis of Merger Success                                                        | 38 |
| II.4.1 Prior Research                                                                  | 38 |
| II.4.2 Methodology                                                                     | 39 |
| II.4.2.1 Study Design                                                                  | 39 |
| II.4.2.2 Merger Selection                                                              | 39 |
| II.4.2.3 Performance Indicators                                                        | 41 |

|           |                                                                                            |     |
|-----------|--------------------------------------------------------------------------------------------|-----|
| II.4.3    | Stand-Alone Case Study Analysis                                                            | 41  |
| II.4.3.1  | Case Study One – Large absorbs Small                                                       | 42  |
| II.4.3.2  | Case Study Two – Distress Merger                                                           | 44  |
| II.4.3.3  | Case Study Three – “Normal” Merger                                                         | 46  |
| II.4.3.4  | Case Study Four – Multiple PSB Merger                                                      | 48  |
| II.4.4    | Comparative Analysis                                                                       | 50  |
| II.5      | Conclusion                                                                                 | 54  |
| Appendix  |                                                                                            | 56  |
| III       | Shareholder Wealth Effects at Rival Banks: Empirical Evidence on European Cross-Border M&A | 57  |
| III.1     | Introduction                                                                               | 57  |
| III.1.1   | Objective and Motivation                                                                   | 57  |
| III.1.2   | Course of the Investigation                                                                | 60  |
| III.2     | The European Banking Market                                                                | 60  |
| III.2.1   | Heterogeneity, Harmonization, and Deregulation                                             | 60  |
| III.2.2   | Consolidation and Cross-Border M&A                                                         | 63  |
| III.3     | Literature Review and Hypotheses Generation                                                | 66  |
| III.3.1   | M&A in the Banking Industry                                                                | 67  |
| III.3.2   | Effects of M&A Announcements on Rivals                                                     | 73  |
| III.3.3   | Hypotheses Generation                                                                      | 77  |
| III.4     | Event Study Analysis                                                                       | 80  |
| III.4.1   | Applied Methodology                                                                        | 80  |
| III.4.1.1 | Market Model and Abnormal Returns                                                          | 80  |
| III.4.1.2 | Event Window Selection                                                                     | 83  |
| III.4.2   | Sample and Data Selection                                                                  | 83  |
| III.4.3   | Descriptive Statistics                                                                     | 85  |
| III.4.4   | Event Study Results                                                                        | 88  |
| III.4.4.1 | Bidders and Targets                                                                        | 88  |
| III.4.4.2 | Rival Effects of Total Rival Portfolio                                                     | 90  |
| III.4.4.3 | Rival Effects according to Regional Proximity to Target                                    | 91  |
| III.4.4.4 | Rival Effects according to Location of Bidder                                              | 93  |
| III.4.5   | Discussion                                                                                 | 94  |
| III.5     | Conclusion                                                                                 | 97  |
| IV        | Shareholder Wealth Effects of REIT M&A: An International Analysis                          | 101 |
| IV.1      | Introduction                                                                               | 101 |
| IV.1.1    | Objective and Motivation                                                                   | 101 |

|                                                          |     |
|----------------------------------------------------------|-----|
| IV.1.2 Course of the Investigation                       | 103 |
| IV.2 Background Knowledge on REITs                       | 104 |
| IV.2.1 Definition                                        | 104 |
| IV.2.2 Historical Development in the US                  | 105 |
| IV.2.3 Internationalization of REITs                     | 107 |
| IV.2.4 Particularities of REITs                          | 109 |
| IV.3 Literature Review and Hypotheses Generation         | 111 |
| IV.3.1 Literature Review                                 | 111 |
| IV.3.2 Hypotheses Generation                             | 114 |
| IV.4 Event Study Analysis                                | 117 |
