Preface by Prof. Dr. A. Herrmann	XVII
Preface by Dr. L. P. Marighetti	XIX

Part I Introduction

1 Goal	3
1.1 Research objectives	3
1.1.1 Theoretical perspective	3
1.1.2 Practical perspective	5
1.2 Organisation of the document	7
1.2.1 Structure	7
1.2.2 Lists	8
2 Motivation	9
2.1 Market development	9
2.1.1 Market size and structure	10
2.1.2 Drivers	11
2.1.3 Protagonists	17
2.1.4 Current situation and outlook	18
2.2 Practical pitfalls	19
2.2.1 General issues	20
2.2.2 Business-service-specific issues	23
2.3 Theoretic interest	25
2.3.1 Service specifics	26
2.3.2 Industrial good specifics	28
3 Basic concepts	31
3.1 Marketing concepts	31
3.2 Investment-banking-specific concepts	33
3.2.1 Definitions	33

3.2.2	Investment banks' tasks	36
3.2.3	Solicitation for mandate	39

Part II **Theoretic foundations and preliminary conclusions**

4	Risk and its explanatory power	51
4.1	The concept of risk	52
4.1.1	Perceived risk	52
4.1.2	Risk components	53
4.1.3	Corporate and personal risk	57
4.1.4	Underlying risk and transfer lever	59
4.2	Risk reduction methods	62
4.2.1	Thresholds	62
4.2.2	Uncertainty and consequence relievers	63
4.2.3	Mode of action risk reliever typology	64
4.2.4	Inherent risk and handled risk	73
5	Information and its utility	77
5.1	The concept of information	77
5.1.1	Types of uncertainty	77
5.1.2	Uncertainty of compliance in M&A advisory	83
5.1.3	Cost, benefit, and utility of information	85
5.2	Natural information typology	86
5.2.1	Cognitive vehicle	88
5.2.2	Reference	94
5.2.3	Affinity	96
5.2.4	Source	101
5.3	Reputation, relationship, information search	103
5.3.1	Reputation	103
5.3.2	Benefits of a good reputation	105
5.3.3	Relationship	110
5.3.4	Information search	112
6	Product classifications in the light of risk and information	115
6.1	Review of characteristics	116
6.1.1	Select approaches	116
6.1.2	Further classification parameters	120
6.2	Parameters' impact on the consequence component of risk	122

6.2.1	Product characteristics affecting the consequence component of risk	122
6.2.2	Product characteristics not affecting the consequence component of risk	123
6.3	Parameters' impact on the uncertainty component of risk	124
6.3.1	Product characteristics affecting the utility of information for quality uncertainty decrease . .	125
6.3.2	Product characteristics not affecting the utility of information for quality uncertainty decrease	129
7	The M&A advisor choice from a risk perspective	131
7.1	Consequence associated with the M&A advisor choice	131
7.1.1	Influence of M&A risk on M&A advisor choice risk	131
7.1.2	Risk associated with an M&A transaction . . .	132
7.2	Uncertainty associated with the M&A advisor choice .	139
7.2.1	Drivers	139
7.2.2	Relievers	140
8	The M&A advisor choice from an information perspective .	145
8.1	Vehicles a company might base its choice on	145
8.1.1	Most important concepts	146
8.1.2	Characterisation by means of natural characteristics	148
8.1.3	Assessment of information type prerequisites .	150
8.2	Signal vehicles' role in the marketing of M&A advisory	156
8.2.1	General importance of signal vehicles	156
8.2.2	Importance of signal vehicles for repeat buyers	159
8.2.3	Signal vehicles' "natural owner"	160
8.2.4	Signal vehicles' utility for uncertainty decrease	162
8.2.5	Satisfaction with execution and re-engagement intention	163
8.2.6	Importance of signal vehicles by type of selection procedure	165

Part III Research and discussion

9	Data collection and analytic methods	169
9.1	Data	169

9.1.1	Instrument	169
9.1.2	Sample	170
9.2	Methods	177
9.2.1	Measurement	177
9.2.2	Operationalisation of specific concepts	178
9.2.3	Dissonance reduction	180
9.2.4	Philosophy of science background	181
9.2.5	Data analysis technique	181
9.2.6	Statistical package	185
10	Review and discussion of results	187
10.1	Risk associated with the advisor choice	187
10.1.1	Consequence component	190
10.1.2	Uncertainty component	193
10.2	Information used to determine the advisor choice	197
10.2.1	Importance of signal vehicles in general	200
10.2.2	Importance of signal vehicles for repeat buyers	204
10.2.3	Signal vehicles' "natural owner"	206
10.2.4	Signal vehicles' utility for uncertainty decrease	211
10.2.5	Satisfaction with execution and re-engagement intention	213
10.2.6	Importance of signal vehicles by type of selec- tion procedure	219
11	Complementary and deepening analyses	221
11.1	Convictions and perceptions	221
11.1.1	Investment banking experience	221
11.1.2	Importance of investment bank's role in M&A	222
11.1.3	Risk associated with the M&A project	223
11.1.4	Consequence component of risk associated with the bank selection	224
11.1.5	Uncertainty component of risk associated with the bank selection	225
11.1.6	Banker-bank importance	227
11.1.7	Summary	228
11.2	Actual behaviour and implementation	229
11.2.1	Incidence of selection types in market	229
11.2.2	Quantity structure of the purchase funnel	230
11.2.3	Specific banks' conversion rates	232
11.2.4	Summary	234
11.3	Revealed importance of signal vehicles	235

11.3.1	Data and method	235
11.3.2	Vehicles' influence along the purchase funnel	237
11.3.3	Vehicles' influence by selection and buyer type	241
11.3.4	Summary	245
12	Synthesis and outlook	249
12.1	Theoretical perspective	249
12.1.1	Power of applied frameworks and further explanation needs	249
12.1.2	Limitations and broadening research needs	251
12.2	Practical perspective	252
12.2.1	Risk and risk relief perspective	252
12.2.2	A broader perspective on remuneration schemes	258
12.2.3	Signal vehicle perspective	262
12.2.4	A broader perspective on goodwill creation	271
12.2.5	Individual-corporation antagonism perspective	274
	Appendix	283
