

Ralph Leonhardt

Foreign Direct Investment,
Ownership,
and the Transfer of Technology

PETER LANG

Contents

1	Introduction	12
2	The econometrics of ownership shares	15
2.1	Introduction	15
2.2	Theoretical framework–Sovereign risk and spillover	19
2.2.1	The model	19
2.2.2	Determinants of ownership shares–Predictions . . .	21
2.3	Estimation	24
2.3.1	Classical models for share equation estimation . . .	24
2.3.1.1	Linear share models	25
2.3.1.2	Nonlinear share models	27
2.3.1.3	Stochastic specifications	28
2.3.2	Subsample regression	29
2.3.3	Conditional Tobit estimation	30
2.3.4	Bias	35
2.3.5	Interpretation of estimates	35
2.3.6	A pseudo- R^2 for the conditional Tobit model	36
2.4	Data and estimation Results	37
2.4.1	Data	37
2.4.2	Variables	37
2.5	Discussion	39
2.6	Conclusion	44

3	International technology transfer and the joint venture life-cycle	46
3.1	Introduction	46
3.2	Review of the literature	49
3.2.1	Empirical literature	49
3.2.1.1	Firm policy and joint venture instability (Franko 1971)	49
3.2.1.2	The risk of joint venture breakdown (Kogut 1989)	50
3.2.2	Theoretical literature	53
3.2.2.1	Cooperation and rivalry (d'Aspremont and Jacquemin, 1988)	55
3.2.2.2	The pioneer (Kabiraj 1999)	57
3.2.2.3	Local participation requirements and the effect of governmental policy (Sinha 2001)	61
3.2.2.4	Mutual synergies (Roy Chowdhury and Roy Chowdhury 2001)	64
3.2.3	Summary and conclusion	70
3.3	Optimal ownership in international joint ventures and technology transfer—the static case	73
3.3.1	The economic environment	73
3.3.2	Definitions	75
3.3.3	The static model of international joint ventures	77
3.3.3.1	Model solution and comparative statics	85
3.4	Optimal ownership in international joint ventures and technology transfer—the dynamic case	90
3.4.1	Introduction	90
3.4.2	Notation	91
3.4.3	Ownership dynamics with autonomous spillover	92
3.4.4	Ownership dynamics with controllable spillover	98
3.4.4.1	Introduction	98

3.4.4.2	The indirect Euler equation approach . . .	98
3.4.4.3	On the optimal technology path	102
3.4.4.4	Joint venture breakdown–The transversality condition	106
3.4.5	Spillover and joint venture instability	115
3.5	Discussion	117
3.5.1	Ownership and spillover	117
3.5.2	Aggregate ownership patterns	118
3.5.3	Technology spillover in foreign direct investment . .	123
3.5.4	The value of transferred knowledge	125
3.5.5	Policy recommendations	127
3.6	Conclusion	129
4	Concluding remarks	131
A	Maximum likelihood theory and numerical optimization	133
A.1	Maximum likelihood theory	133
A.2	Numerical optimization	134
A.3	Implementation issues	135
A.4	Implementation	136
B	Static Model–Extensions	144
B.1	The validity of the first order approach	144
B.2	Market structure and joint venture formation	145
B.3	Joint venture as a truth-revealing mechanism	149
C	Dynamic optimization	151
C.1	Auxiliary lemmata and results	151
D	Selected Symbols and Abbreviations	153
D.1	Selected symbols and abbreviations for chapter 2	153
D.2	Selected symbols and abbreviations for chapter 3	154
