## Details

As with the previous volumes, this book aims to present a timely portrait of the rapid growth of China's logistics market and the status quo of its logistics industry. It provides an in-depth analysis of critical issues involved in the ongoing dynamic and multi-faceted development and serves as a valuable reference resource for interested readers in the academic and professional fields. The opening chapter offers a comprehensive overview of the impressive advancements and accomplishments made by China's logistics industry in the last twenty years, and the following chapters cover macro-factors related to logistics technologies and facilities, region-specific policies and plans, industry-wide transformation in transport, manufacturing, commerce, and agriculture. The book explores two important topics: "Industrial and Supply Chain Safety and Stability" and "Low-Carbon Transformation," highlighting the latest trends and initiatives in China's logistics industry. It also sheds lights on the development and prospects of logistics in the Hainan Free Trade Port, including a detailed analysis of the opportunities and challenges faced by this emerging logistics hub.
