## **Details**

This book features a collection of high-quality and peer-reviewed papers from the 2022 6th International Conference on Applied Economics and Business (ICAEB), which was held in Stockholm, Sweden, during August 24-26, 2022. ICAEB serves as a platform for presentation of new advances and research results in the fields of applied economics and business. Applied economics is used to improve the quality of practice in business and public policy by thinking meticulously about new ways to approach old problems. Presentations at the conference include the topical areas of development, ecological, financial, forensic, information, institutional, international, labor, managerial, mathematical, monetary, and other related economic aspects. All these topics relate to an overall theme of sustainable development from an economic perspective. The conference brings together scientists from different fields of applied economic research in order to exchange ideas and experiences leading to improved methods of economic analysis.
