Details

LP³ is a simple, easy-to-grasp leadership model, covering so-called “soft” factors in a structured, transparent way. It is centred on a common language and shared understanding of leadership. The aim is to enable people to apply sustainable economic principles in their business and treat those around them with confidence, respect and clarity. Taking practical examples, David Fiorucci and Thomas Nast show how successful leadership, self-reflection and the right attitude are interconnected. The model applies at both the individual level, in terms of personal development, and that of the team or company. “LP³ leadership opens the way to a fresh understanding of leadership, worthy of the 21st century. Its focus on practice makes it directly applicable.” Christian Santschi, mag. rer. pol., president of the SVF-ASFC Swiss association for management training
