## **Details**

This book investigates the role played by classical and digital media, and social networks in shaping debates on the environment. Providing a unique window of observation on environmental debates, the book explores the media theatre from the post-communist perspective of Albania. The work navigates the creation and development of environmental debate in Albania using evidence-based case studies, investigating the role of actors involved, who are closely related to the media, such as in business or politics.

*Environmental Debates in Albania* offers an original insight on environmental debate, which is closely tied to and influenced by the place and culture within which it originates. Rich literature exists on global environmental issues, protests, policy and the rhetoric around climate change; this book supplies another piece to the puzzle through its focus on the under-researched area of environmental debate in post-communist and Eastern European countries.
