### **Details**

This edited volume discusses time and fractal phenomena in economics, entrepreneurship, and management. Chapters embrace a wide spectrum of topics, such as time series analysis of entrepreneurial orientation, theoretical research on the effectiveness of time management in dynamics of employee-organization relationship, the degradation of goals over time and how ambiguity and managerial cognition shape distributions of project time and cost, and fractal characteristics in energy markets and organizations. Revealing emerging aspects of time and fractals across disciplines, this volume demonstrates their significance in advancing economics, entrepreneurship, and management research. As such, this text will be useful for academics, researchers, management professionals and policy makers.
