### **Details**

This book, through systematic analyses and reviews, provides an up-to-date and holistic perspective on the progress of sustainable awareness and practices in different fields in Vietnam, such as Economics, Business, Finance, Law, and Management. Although other publications have covered the topic of sustainability in Vietnam in a broader context, this book explores in-depth, areas that have not been previously explored, such as the impact of foreign direct investment on environmental quality and the recently signed free trade agreements.

Due to the increasing popularity and significance as well as the volatile nature of issues related to sustainability, this book serves as a timely and comprehensive reference for those who wish to develop a deep understanding of the field.
