The book provides insights to the alleviation of tensions between Chinese tax incentives and the WTO's subsidy rules, thus further offering implications for both China and the WTO on integrating in the world economy. Moreover, doing a comparative study with EU State aid law can also provide China with a source of inspiration for reviewing its legal mechanism in respect of tax incentives and the WTO for rethinking its subsidy rules with regard to achieving its objectives and purposes. Academics and students in related subject will be interested to read the book. Practitioners doing business related to China, EU and international trade can be very interested in this book.
